

Kaushik Vaghasiya

Development Team Head | Sr. Node.js Developer | Solution-Oriented
+91 6353125194 | kaushikvaghasiya605@gmail.com | [LinkedIn](#)

Solution-oriented **Sr. Node.js Developer & Team Lead** with **4+ years of experience** in architecting and delivering scalable web and mobile applications. Proven expertise in **backend systems, REST & GraphQL APIs, microservices, cloud deployment, and third-party integrations**. Strong track record of driving **35% higher user engagement** and reducing development lifecycles by **30%** through Agile leadership and CI/CD automation. Skilled in aligning cross-functional teams to deliver **secure, high-performance, user-centric solutions**.

Core Skills

- Backend Development:** Node.js, Express.js, Microservices, REST APIs, GraphQL
- Databases:** MongoDB, MySQL, Mongoose, Database Optimization
- Frontend:** React.js, AngularJS, JavaScript (ES6+), HTML, CSS
- API Integrations:** Razorpay, Stripe, PayPal, Cashfree, Twilio, OneSignal
- Cloud & DevOps:** AWS (EC2, Lambda, S3), DigitalOcean, Render, CI/CD (GitHub Actions, Docker, Kubernetes), Google Cloud Storage (GCS)
- Testing & Security:** Jest, Mocha, Chai, Cypress, JWT, OAuth2, RBAC, 2FA, API Security
- Methodologies & Leadership:** Agile/Scrum, SDLC, Team Leadership, Sprint Management, Client Communication

Work History

- Sr. Node.js Developer (Contract | Remote)**

Oct 2025 – Present

 - Designed and developed scalable backend services for a travel booking & itinerary management platform using Node.js and Express.js.
 - Integrated Stripe Payment Gateway for secure transactions and Cloudinary for media uploads and automatic image optimization.
- Corenet Tech India - Development Team Head | Sr. Node.js Developer**

March 2024 – Oct 2025

 - Spearheaded the end-to-end SDLC for multiple web and mobile applications by leading and mentoring a cross-functional Agile team.
 - Engineered scalable Node.js/Express.js solutions, boosting system efficiency by 25%.
 - Executed CI/CD pipelines, accelerating development cycles by 30% and improving deployment reliability.
 - Integrated Firebase Cloud Messaging and GCS for efficient real-time data handling and file storage across microservices.
- Hit InfoTech - Frontend Developer | Jr. Full Stack Developer**

Aug 2022 - Feb 2024

 - Improved full-stack application performance by 20%, reducing load times with optimized API integrations.
 - Collaborated with backend developers and UX designers to deliver **5+ responsive features**, improving user retention by 15%.
- Swicktech Solution - Backend Developer**

Oct 2021 - Jul 2022

 - Built and maintained secure, high-performance backend services for a task management platform serving **10,000+ active monthly users**.
 - Integrated **5+ third-party services** and optimized MongoDB queries, improving server response time by **35%** and reducing downtime incidents by **20%**.

Education

Bachelor of Computer Applications (BCA) | March 2023
Shree Uttar Gujarat BBA & BCA College, Gujarat

Projects

- Grabit | Node.js, React.js, MongoDB, Razorpay, Cashfree, Twilio**

 - Developed and enhanced a multi-role platform (User, Business, Admin) with shop, order management, and automated payout modules.
 - Integrated Razorpay & Cashfree for payments and implemented Twilio-based notifications, boosting merchant adoption by **20%**.
- Job Placement Portal (Skill Connect) | Node.js, React.js/AngularJS, MongoDB, PayPal**

 - Engineered a secure dual registration & authentication system for companies and job candidates, ensuring **100% data isolation & compliance**.
 - Automated job posting renewals and interview scheduling, reducing manual workload by **50%**.
- Clutchly AI | Node.js, Express.js, MongoDB, JWT**

 - Designed scalable microservices with ETL pipelines and ML models, achieving **<2s latency** and **99.5% uptime**.
 - Built a config-driven scoring engine supporting multiple fantasy platforms (Dream11, MPL) without redeployment.
- Janadesh | Node.js, Express.js, MongoDB**

 - Enhanced a civic engagement platform with complaint **tracking, KYC, and social features**.
 - Directed the development of government dashboards for post moderation, analytics, and complaint resolution workflows.
- E-Commerce Platform | Node.js, Express.js, MongoDB, Stripe**

 - Expanded a **REST API backend for product catalog, inventory, orders, and payments**.
 - Implemented **Stripe payments**, ensuring secure and reliable transactions.
- LithiaRX | Node.js, Express.js, AngularJS, MongoDB, 2FA**

 - Developed full-stack services with **robust backend (Express.js) and dynamic AngularJS frontend**.
 - Strengthened platform security by implementing **Two-Factor Authentication (2FA)**.
